Women’s Earth and Climate Action Network (WECAN) Education and Advocacy on-Line Training

Pennie Opal Plant
On August 6, 2012, release of flammable vapor led to a fire at the Chevron Refinery in Richmond, California.

The U.S. Chemical Safety Board said the fire happened because weak state regulations allowed the company to monitor rather than simply fix potential problems. Company engineers had recommended that the fire source, a corroded pipe, be replaced.
Rights of Mother Earth
In the fight against Chevron, the people of Ecuador and the people of Richmond can deploy the most devastating weapon ever invented.

The truth.
